

Missouri High Efficiency Central Air Conditioner Rebate Program Information & Application

Beginning January 1, 2009, installers must have provided Empire with evidence of load calculation training and system charging and airflow training. This training must have occurred on or after January 1, 2007. A list of approved contractors is provided below.

The Empire District Electric Company can help its Missouri electric customers, landlords, and home builders afford a high efficiency central air conditioning or heat pump system through its High Efficiency Residential Central Air Conditioning Rebate Program. Not only will you receive a rebate, you will also enjoy the benefit of higher efficiency equipment which could mean reduced electricity consumption and lower costs.

Why is Empire District making this offer?

Air conditioner efficiency is important because units with higher efficiencies assist in reducing the peak demand placed on the electrical system during the summer months. Reduced peak electric demand helps us to keep power cost down now and in the future.

How does this work?

Install a new system while this program is in effect and a rebate from Empire District will cover a portion of the incremental cost of the higher efficiency equipment:

Equipment Rating*	Rebate Amount
SEER of 15 to 15.9	\$400
SEER of 16 to 16.9	\$450
SEER of 17 or higher	\$500

*SEER (seasonal energy efficiency ratio) measures how efficiently a residential central cooling system (air conditioner or heat pump) will operate over an entire cooling season. A higher SEER reflects a more efficient cooling system.

What do I do to qualify for a rebate?

- ✓ Complete the following application form.
- ✓ An invoice from the installing contractor that includes the applicant's name, the physical address of the equipment installation, the manufacturer and model number of the outdoor unit, indoor unit, and furnace.
- ✓ Provide an AHRI Certificate of Product Ratings or manufacturer's literature verifying the SEER of the installed equipment, provided by the installing contractor.
- ✓ Provide a copy of the Manual J (or industry equivalent) load calculation or a certification from the installer or builder that such a calculation has been performed on this residence.
- ✓ If the installing contractor has not provided Empire with evidence of the required training, he must do so before application can be processed.

Rebates are available on a "first-come, first-served" basis, as long as funds last, to Missouri electric residential customers of The Empire District Electric Company, to owners of residential rental property, and to builders of homes in Empire's Missouri electric service territory.

For more information, contact The Empire District Electric Company by phone at 800-206-2300 or by email at energy.efficiency@empiredistrict.com.
