

Missouri Heating, Ventilation, and Air Conditioning (“HVAC”) Rebate Program Information & Application

Liberty Utilities – Empire District’s HVAC Rebate Program is designed to encourage the efficient use of energy through the purchase and installation of energy efficient HVAC systems by providing rebates to lower the cost of such improvements for residential customers. Not only will you receive a rebate, you will also enjoy the benefit of higher efficiency equipment which could mean reduced electricity consumption and lower costs.

Why is Liberty Utilities making this offer?

Air conditioner efficiency is important because units with higher efficiencies assist in reducing the peak demand placed on the electrical system during the summer months. Reduced peak electric demand helps us to keep power cost down now and in the future.

How does this work?

Install a new system while this program is in effect and a rebate from Liberty Utilities will cover a portion of the incremental cost of the higher efficiency equipment:

Equipment Rating*	Rebate Amount
SEER of 15 to 15.9	\$250
SEER of 16 to 16.9	\$350
SEER of 17 or higher	\$450
Mini-split Heat Pumps	\$300**

*SEER (seasonal energy efficiency ratio) measures how efficiently a residential central cooling system (air conditioner or heat pump) will operate over an entire cooling season. A higher SEER reflects a more efficient cooling system.

**Mini-Split Heat Pump rebates are limited to one per household per year, even if multiple systems are installed.

What do I do to qualify for a rebate?

- ✓ Complete the following application form.
- ✓ Complete the Load Calculation Verification form, which verifies that a load calculation has been performed on this home to ensure the system has been correctly sized.
- ✓ An invoice from the installing contractor that includes the applicant’s name, the physical address of the equipment installation, the manufacturer and model number of the outdoor unit, indoor unit, and furnace.
- ✓ Provide an AHRI Certificate of Product Ratings or manufacturer’s literature verifying the SEER of the installed equipment, provided by the installing contractor.

Rebates are available on a "first-come, first-served" basis, as long as funds last, to Missouri electric residential customers of Liberty Utilities – Empire District, to owners of residential rental property, and to builders of homes in Liberty’s Missouri electric service territory.

For more information, contact Liberty Utilities – Empire District by phone at 800-206-2300 or by email at energy.efficiency@empiredistrict.com.

HVAC REBATE PROGRAM

LOAD CALCULATION VERIFICATION

(To be completed by installer)

Applicant Name _____

Physical Address of Installation _____

City, State, Zip _____

Square footage of home _____

Calculated cooling load _____ BTUH

Size of central air conditioner or heat pump installed _____ Tons

Date of installation _____

Method used in load calculation (e.g. Manual J Worksheet, load calculation software; if software was used, name of program):

Form completed by _____
(print name)

(company name)

(signature)

Date: _____
